Environmental Statement

For several decades now social and environmental responsibility has been a fundamental value for the Harlequin group. Thanks to products that respect the environment and our advanced technological processes, each stage in the production generates a minimum environmental impact.

Our responsible product supply policy is dictated both by the customer's demand for quality and our own concern to protect the environment. That is why we select our suppliers very carefully from among those who share our environmental and social convictions.

As our PVC surfaces are fully recyclable, they are often described as a sustainable product and the Harlequin group recycles almost 100% of its production waste. It is also committed to recycling all Harlequin products that are returned to its European factories for recycling at the end of their lives. A commitment by which the group seeks to minimise both its own carbon footprint and that of its customers.
